We need to reduce the harm caused by smoking, drinking and drugs in Scotland. Although there is no safe way to smoke, no safe level of drinking alcohol and no completely safe level of drug use, the number of people using these substances and the harm caused to both them and those around them can be minimised.

Please take the time to complete our survey - we will use the results of the survey to tailor the new bulletin to ensure it is relevant.

Obtaining full text journal articles

Please note that the full text of most of these articles can be obtained using an NHS Scotland Athens username and password.

You are eligible for an Athens username and password if you work in Scotland and fall into any of the following categories:

- NHS staff
- Anybody working in partnership with the NHS
You can obtain an Athens username and password by registering with Athens: https://www.athensregistration.scot.nhs.uk/

NHS staff requiring access to full text articles that are not available via this route should contact the library service in their local NHS Board.

Other subscribers should contact us on the number/email address below for further information on how to obtain full text articles.
